THE WAITER

CUSTOM FIGURINE FOR LE DADA, PARIS 17

A COLLABORATION WITH

Olivia Decaris Design
INTERIOR ARCHITECT & DESIGNER

Commissioned by Paris-based interior architect and designer **Olivia Decaris**, known for her distinctive cafés and restaurants across Paris, this 45 cm figurine was created for Le Dada, Avenue des Ternes.

Inspired by Olivia Decaris' original illustrations and the restaurant's murals, the character reinterprets the iconic French waiter with an elegant posture, a touch of humor and a strong sense of movement.

The challenge was to translate this 2D artwork into a physical piece while preserving every detail of the expression, attitude and spirit of the place.

CUSTOM 3D PRINTING

> Olivia Decaris' universe is all about character and emotion. We are proud to bring her drawings to life in 3D, with the **same attention to detail and elegance.**

THE KNIGHT

CUSTOM FIGURINE INSPIRED BY A VIDEO GAME SKIN

This piece was commissioned as a birthday gift.
The client wanted a figurine based on a video game skin.
The design was first improved into a better quality concept, then turned into a 3D model, and finally produced as a custom 25 cm figurine.

Special attention was given to the armor details, the silhouette, and the faithful translation from the virtual character to a physical object.

PORTFOLIO PROJECT

THE CROWN

CUSTOM DOLL ACCESSORY

A custom crown accessory developed for a fashion doll, inspired by a stylized design with intricate floral details. The concept was adapted into a 3D model optimized for miniature scale, preserving the ornamental shapes, texture and elegant silhouette while ensuring printability and durability.

The piece was resin printed, carefully prepared, assembled and hand painted. The final accessory features a smooth finish, vibrant colors and refined sculpted details, and was designed to fit securely on the doll while staying true to the original artwork.

PORTFOLIO PROJECT

THE ODDSTURGEON

COLLECTIBLE FIGURINE PRODUCTION

This project focused on bringing Oddsturgeon to life as a collectible figurine. Starting from the original 2D artwork, the character was adapted into a full 3D model, resin printed, and then hand painted to create the final physical piece.

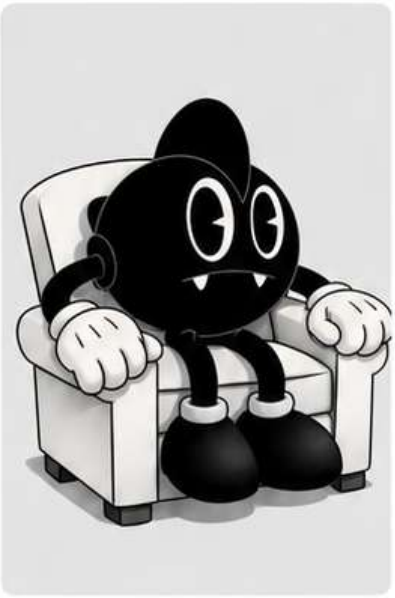

Special attention was given to keeping the character's identity, expression, and collectible appeal. The goal was to preserve the charm of the design while translating it into a strong display collectible.

THE WEDDING TOPPER

CUSTOM CAKE TOPPER INSPIRED BY SMISKI

This piece was a special request for a wedding cake topper, inspired by the playful Smiski aesthetic. The concept was first designed as a custom couple figurine, then developed into a 3D model, and finally produced as a finished physical piece. The final object was created to sit on top of a wedding cake and includes a glow-in-the-dark effect for an extra playful touch.

The challenge was to create a minimalist, cute, and personal topper while keeping a clean silhouette and a soft handmade feel.

THE HORSE

CUSTOM COLLECTIBLE FIGURINE

A custom character figurine developed from an illustrated horse reference. The design was translated into a printable 3D form while preserving the stylized silhouette, expressive face, flowing mane and recognizable proportions.

The piece was produced in resin, carefully prepared, assembled and painted. The final finish recreates the warm golden coat, black mane and tail, and the small facial details that give the character its personality.
