THE MAIN COMMERCIAL ARGUMENT

Flexible production for custom projects, without industrial quantities.

Produced in France

Local production, direct communication and flexible project follow-up.

Produce without industrial quantities

- No need to order thousands.
- Test a concept first.
- Launch small quantities.
- Restock according to demand.

Production options

- Unique prototype
- Small series
- Different sizes / materials / finishes

THE WAITER

CUSTOM FIGURINE FOR LE DADA, PARIS 17

A COLLABORATION WITH

Olivia Decaris Design
INTERIOR ARCHITECT & DESIGNER

Commissioned by Paris-based interior architect and designer **Olivia Decaris**, known for her distinctive cafés and restaurants across Paris, this 45 cm figurine was created for Le Dada, Avenue des Ternes.

Inspired by Olivia Decaris' original illustrations and the restaurant's murals, the character reinterprets the iconic French waiter with an elegant posture, a touch of humor and a strong sense of movement.

The challenge was to translate this 2D artwork into a physical piece while preserving every detail of the expression, attitude and spirit of the place.

45 cm tall

Resin printed
High detail and precision

Multi-part assembly
Careful fitting and bonding

Hand finished
Painted and refined by hand

ODD3D®
CUSTOM 3D PRINTING

> Olivia Decaris' universe is all about character and emotion. We are proud to bring her drawings to life in 3D, with the **same attention to detail and elegance.**

THE KNIGHT

CUSTOM FIGURINE INSPIRED BY A VIDEO GAME SKIN

This piece was commissioned as a birthday gift.
The client wanted a figurine based on a video game skin.
The design was first improved into a better quality concept, then turned into a 3D model, and finally produced as a custom 25 cm figurine.

Special attention was given to the armor details, the silhouette, and the faithful translation from the virtual character to a physical object.

PORTFOLIO PROJECT

THE CROWN

CUSTOM DOLL ACCESSORY

A custom crown accessory developed for a fashion doll, inspired by a stylized design with intricate floral details. The concept was adapted into a 3D model optimized for miniature scale, preserving the ornamental shapes, texture and elegant silhouette while ensuring printability and durability.

The piece was resin printed, carefully prepared, assembled and hand painted. The final accessory features a smooth finish, vibrant colors and refined sculpted details, and was designed to fit securely on the doll while staying true to the original artwork.

THE WEDDING TOPPER

CUSTOM CAKE TOPPER INSPIRED BY SMISKI

This piece was a special request for a wedding cake topper, inspired by the playful Smiski aesthetic. The concept was first designed as a custom couple figurine, then developed into a 3D model, and finally produced as a finished physical piece. The final object was created to sit on top of a wedding cake and includes a glow-in-the-dark effect for an extra playful touch.

The challenge was to create a minimalist, cute, and personal topper while keeping a clean silhouette and a soft handmade feel.

CUSTOMER REVIEWS

★★★★★

100+ satisfied customers worldwide

★★★★★

ODD3D exceeded my expectations with this and delivered exactly what I needed. The 3D models he made are very well done. He was friendly to chat with, and responded promptly to messages to keep me informed. Overall, the order went smoothly and I would definitely recommend working with ODD3D over other 3D designers.

★★★★★

J'ai commandé une figurine pour l'anniversaire d'un ami. Tout au long du processus de création, le vendeur a posé toutes les questions nécessaires pour rendre le projet le plus beau possible. Il a été à l'écoute, toujours très professionnel malgré toutes mes demandes, et répondait très vite. Lorsque j'ai reçu le colis, j'ai vu qu'il était très bien protégé : même le livreur le plus enragé n'aurait pas pu l'endommager. Le résultat final est plus que magnifique (dommage qu'on ne puisse pas mettre plus que 5 étoiles) et je recommande plus que vivement les services de ODD3D.

★★★★★

After I made a mistake with one of the measurements, I got in contact with them to ask if I could repay to get the project done again and they offered me a discounted rate which I was very grateful for and once again they delivered a very high quality product with a very quick turn over rate. I would strongly recommend ODD3D for any project like this and will be coming back to them again in future!

★★★★★

I messaged ODD3D not knowing if my project would ever come to fruition because I didn't know if what I wanted could be done at the budget I had but after discussing with him, he showed me what he could do and made me a very generous custom offer that would fit my project! I wanted a custom head sculpt of my face for my custom Doctor Who figurine of myself as The Doctor. He has been very very exceedingly professional, friendly and quick to respond and I have never had such a brilliant service in my life. I wish I'd found him earlier because I'd have had more stuff made - I know I'll be coming back! If your looking for something to be 3d printed and painted in 1, this is the freelancer for you!

★★★★★

Très content du travail de ODD3D.
Très pro, à l'écoute et super efficace !

Merci encore, je le recommande clairement 😀
